INTRODUCTION

Solidity | Web3 | Ethereum | Cryptocurrency | Polkadot Fullstack Developer

A seasoned, results-driven blockchain & full-stack engineer. Always be hungry for learning new technology & improving myself. Especially on Blockchain scope. Have been developing lots of programming languages, framworks, libraries, platforms.
Especially on JS/TS fields. Over the last 2 years, mainly focusing on blockchain technology, Solidity | Web3 | Ether | Ploka | Solana | Solana-web3. Really eager to participate any DEFI & DApp firms and boost the project with my enthusiasm & experience.

EXPERIENCE

Solidity|Smart Contract Developer
Ratio Finance
📅 09/2021 - 12/2021   📍 United States
Token Lending Platform
Deposit loans with collateral ratio and lend USDT stable token
- Developed Smart Contract for Token Lending platform
- Developed Smart Contract for deposit LP tokens to Raydium Staking pool
- Developed Vesting Schedule Smart Contract

Solana-Rust | Solana-Web3 Developer
Hubble Axiom
📅 08/2021 - 10/2021   📍 United Kingdom
Solana Ignition Hackathon for decentralize lending protocol with collateral ratio
- Developed Solana-Web3 on React/Typescript based Front-End
- Developed Solana-Rust for lending contract which is deployed onto testnet & devnet
- Review & Test developed smart contract on docker WSL

Web3 FE developer
Visor Finance
📅 04/2021 - 08/2021   📍 United States
Worked on liquidity mining pool providing protocol with uniswapv3core
- Developed Governance Token with ERC20 & Hypervisor token with ERC721
- Introduce the Vuex and improve the performance
- Developed Arbitrum L2RollsUp) and optimize the responding time when switching network
- Biggest challenge was reducing the responding time after delegating unessential web3 calls and resolve the scalability with introducing the L2.

EDUCATION

Limberick University in Ireland
Information Technology

SKILLS

JS   TS   Python   Solidity   C

C#   Rust   Golang   Ruby

Node.js   React   Vue   Next

Nuxt   Angular   Laravel   Django

Flask   AWS   Heroku

React Native   Ionic   Flutter

GraphQL   SCSS   Ethereum

Truffle   Hardhat   Web3js

Etherjs   Polkadot

EXPERIENCE

Web3 | Polka | Ether Front-End developer
Privi Protocol
📅 10/2020 - 04/2021 📍 United States

- Developed privi internal wallet
- Worked web3/ether on React/Typescript based Front-End
- Introduced the Polkadot for substrate chain, and chain-bridge
- Introduce the Polygon

LEAD DEVELOPER
Yubex Team
📅 06/2019 - 03/2020 📍 United States

Worked with a React/Redux environment on a major enterprise product and It is already in production

- Developed software using RESTful APIs with Node.js and Express.js
- Created reusable D3.js charts to visualize the datasets on browsers
- Introduced Sass style guides for a responsive desing
- Refactored the core functionality to have more understnadble code and better performance

---

BLOCKCHAIN DEVELOPER
TrueFi-TRUper
📅 02/2019 - 05/2019 📍 United States

- Have developed Ethereum Smart Energy contract and react Frontend with react, web3, ether.js
- Introduce the embedded signature wallet on existing system

FULLSTACK WEB, MOBILE DEVELOPER
SmoothTeam
📅 05/2017 - 10/2018 📍 United States

- Developed web and database applications to assist with daily business processes for customers and internal team
- Architected and guided the implementation of corporate-wide custormer solutions. Partnered with Value Added Resellers and Independent Sofware Vendors to develop and close opportunites
